

About Journal

International Journal of Diagnostics and Research (IJDR) is an international, open access, peer-reviewed, online, quarterly official publication of Roganidana Vikruti Vigyana PG

Association for Pathology and RadioDiagnosis (www.rvpganagpur.com). This journal is committed to publish science based work emphasising on interdisciplinary diagnostics, treatment and research in all branches of Ayurveda system of medicine, other allied indigenous health systems in India, modern medicine, pharmacology, public health along with contemporary natural and social sciences.

The journal carries a purpose to provide a scientific platform to scholars across the world who are keen to uphold the science of medicine in order to reinforce the mankind.

Journal Vision

International Journal of Diagnostics and Research (IJDR) encourages interdisciplinary and cross disciplinary research in Ayurveda and other contemporary and traditional medical sciences to create a holistic, safe, operative and inclusive approach in healthcare system.

International Journal of Diagnostics and Research (IJDR) promotes the collaborative approaches in medicine and technology in relation to diagnostics, traditional, contemporary and new treatment protocols, diagnostic tools, drug design and public health. International Journal of Diagnostics and Research (IJDR) envisions protection and promotion of health on the basis of originality, authenticity, importance, timeliness and comprehensive research. International Journal of Diagnostics and Research (IJDR) envisions fruitful and effective communications between various stake holders of health care systems on a global platform.

The prominent features of our Visions are as follows :

To give prompt access of global publication to the scientists, researchers, academicians and students

To create awareness about the updates and opportunities in biomedical and clinical research.

To update the readers with latest diagnostic techniques, tools and software.

To meet the increasing demand of required medical information through the global

publication of scientific works and discoveries

To establish rapid review process to accelerate the publication
